Summary

Highly-qualified Java Developer offering 3 years of progressive experience. Expert at designing, developing, maintaining and improving a wide range of products. Clear communicator and effective project manager with leading experience.

Employment History

Doctor Gregory Neat   La Crescenta-Montrose, California
Java Developer   November 2018 - Present

- Created Java Application that allowed students to take tests digitally without allowing access to outside applications to ensure an environment free of cheating
- Completely removed usage of physical, paper-based tests and quizzes in class, saving Dr.Neat many hours and thousands of sheets of paper spent at the copying machine
- Created, accessed and gathered data from google cloud network, including multiple Google Cloud products (e.g., Google Docs, Google Sheets, Google Drive)
- Integrated multiple Layout Managers using Java Swing to create dynamic, flexible application
- Worked directly with customer (Dr. Neat) to ensure full completion of all requirements before integrating additional features into application

Education

Crescenta Valley High School   La Crescenta-Montrose, California
High School Diploma   Graduating June 2019

- Coursework in AP Calculus, AP Environmental Science and AP Computer Science
- Elected to Team Captain for Crescenta Valley Varsity Football Team after 4 years of commitment to the program
- Awarded the Leon Panduro Award for character and growth on and off of the football field
